

7th IIR Conference on Thermophysical Properties  
and Transfer Processes of Refrigerants

# TPTPR 2025

College Park, Maryland USA  
JUNE 15-18

## SPONSORSHIP OPPORTUNITIES

International experts from academia, industry, and government will meet in the outskirts of Washington, D.C., to share the latest developments in eco-friendly refrigerants. Presentations will cover a wide scope of research on thermophysical properties and transfer processes of refrigerants and will provide an opportunity to analyze the state-of-the-art developments in the sector.

With current refrigeration and air-conditioning products contributing to climate change, this conference aims to outline future perspectives and challenges as we move toward solutions that minimize the impact of refrigerants on the global environment.

Organized every four years, the conference is being held in person for the first time since 2017, and will

offer exciting opportunities for collaboration and sharing, as well as the opportunity to tour University of Maryland facilities. The University of Maryland is home to the Center for Environmental Energy Engineering and the state-of-the-art Daikin Energy Innovation Lab.

TPTPR 2025 allows our sponsors to reach a wide audience. Sponsorship options align with your objectives, giving you the maximum exposure during conference sessions and social events.

We value strong, ongoing relationships with each of our sponsors and work closely with you to ensure individual needs are met. Please review the sponsorship opportunities on the reverse and contact [tptpr2025@umd.edu](mailto:tptpr2025@umd.edu) to become a sponsor of this important conference.
